

2231.—Ratings and R.M. Other Ranks—Titles, Specialist Qualifications and Abbreviations for such Titles and Qualifications—Standardization

(N.II/N. 158/49.—24 Jul. 1953.)

In order to achieve uniformity and to avoid the confusion which arises from the use in reports, returns, etc., of irregular or ambiguous abbreviations of the titles and specialist qualifications of R.N. ratings and R.M. other ranks, standard lists of the titles of ratings and R.M. other ranks, of specialist qualifications, and of official abbreviations for these titles and qualifications have been prepared and are promulgated for general guidance as Appendices A and B to this Order.

2. These titles and abbreviations are to be used in all communications, reports, returns, etc.

3. The order in which the branches appear is of first importance and the standard order, as given in the Appendices, is to be used for all purposes, schemes of complement, complement returns, nominal lists, regulations and mobilisation requirements. For instance, if a list of requirements commences with Seamen, Signalmen, E.R.As. Mechanicians, it should be safe to assume that Sailmakers and Telegraphists are not required. It should not be necessary to search through every list and form in case a Sailmaker has been inserted among the Artisans or Cooks. A further advantage will be that should the instructions be received with a part of the text mutilated, or with abbreviations misquoted, the meaning should be clear provided that the correct order has been maintained.
