33/96 RN Uniform — badges worn by RN and QARNNS Officers, Warrant Officers and Ratings — inventory update

[/DCTA/300/9/20 (PM Uniforms): 68209FA]

Background

1. Development of Branch structures, modernisation and other events in recent years have led to some significant changes in the range of badges used by the RN and QARNNS.

2. The purpose of this DCI is to provide a summary of the changes that have had a significant impact on policy for the wear and issue of badges. The Annexes provide up-to-date comprehensive lists of existing, obsolete and replacement badges.

Summary of Changes

Warfare Branch

3. September 1993 saw introduction of a new Warfare Branch badge. The insignia of the existing Weapon Engineering sub Branch was adopted as the basic device with sub branch categorisation denoted by letters underneath. 12 new sub branches were introduced which replaced the following branch badges:

Electronic Warfare
Mine Warfare
Missile
Radar

Radio Operator (General)
Radio Operator (Tactical)
Sonar
Tactical Systems(S/M)
Weapons Analyst

4. Although recruitment is now closed for the above specialisations, successful qualification/cross training of existing strengths to new Warfare Branch standards is not expected to be complete until at least the year 2000. The above obsolescent branch badges will therefore remain in service until they can be phased out progressively as requirements lapse.

5. Issue restrictions imposed initially on new Warfare Branch badges have now been lifted.

Marine Engineering Branch Development (MEBD).

6. The MEBD phase 2 report called for Marine Engineering Mechanics (MEMs) to have a common mechanical and electrical training. Sub specialisation for MEMs below leading hand was discontinued. Selection of the M and L sub specialization would take place at leading rate level.

7. Use of basic M and L badges has been discontinued, stocks have been disposed of and items deleted from the inventory.

8. Able rate M and L badges (with star above the basic device) have been retained to support pre-MEBD ratings still in the Service. The requirement will be reviewed in 1998.

Review of RN Uniform.

9. Deletion of RN Embroidered Red on Blue Badges.

- a. Phase I of the review announced deletion of the second blue uniform suit from RN rating's kit scales together with associated embroidered red on blue arm and collar badges. Issues of the badges to new entrants ceased on 15 Sept 94. Wear of them by serving ratings is allowed on serviceable second suits while stocks last until 30 Sept 96. From 1 Oct 96 no RN red on blue badges are to be worn, except for the Class III cap badge.
- b. A small number of embroidered red on blue badges will remain in service for the RM, CCF and SCC.

10. Woven gold on black shoulder rate badges for Petty Officers and Leading rates.

These badges have been introduced to replace existing red on black patterns. Initial production difficulties with the new badges have been rectified and the stock position should be normalised shortly.

11. Machine Embroidered Synthetic Gold on Blue Badges.

- a. Traditional hand embroidered gold wire badges are made in India and Pakistan. The current production lead time is about 24 months for an average order. Introduction of UK produced machine embroidered badges using synthetic gold metalised thread will shorten deliveries to 12 weeks and reduce costs by at least 30%.
- b. A phased introduction of synthetic badges has started and a few of the new badges are in use. In order to ease the transition, they are being purchased against existing NSNs. Mixed wear of both versions of the badges will be allowed until stocks of gold wire badges are exhausted.

12. Printed Blue on White Badges.

- a. From 1 Jan 95 all *printed* blue on white badges worn on action working dress and coveralls were deleted from the inventory and replaced by appropriate *embroidered* blue on white equivalents.

From that date new entrants have been issued with embroidered badges only and serving personnel are entitled to replace their printed badges with embroidered patterns in the normal course of uniform upkeep.

- b. Owing to initial delays in supply of some embroidered CPO badges, it has been necessary to prolong the use of printed badges or in some cases to use the printed or embroidered version of the PO's badge instead.

Adoption of RN Badges by QARNNS Officers and Ratings.

Officers.

13. As from 3 Sep 95 QARNNS and QARNNS(R) officers adopted RN ranks and titles. A distinctive insignia in the form of a red and gold Queen Alexandra's monogram superimposed on a gold foul anchor has been introduced for the purpose of identification. it is displayed on both sleeves of No.5 and No.7 undress uniform jackets (above the rank lace) and as a brooch on tropical uniforms, white hospital jackets and dresses, white shirts and heavy wool jerseys. Apart from the monogram, QARNNS and QARNNS(R) officers are identified by RN or RNR officer's cap/hat badge and rank insignia as appropriate.

Warrant Officers.

14. Warrant Officers already Wear RN cap and rank badges. Use of the Officer's pattern distinctive cuff badge on the blue uniform suit, as described in Paragraph 13 above, has been extended to Warrant Officers.

Ratings.

15. Senior and junior rates have adopted RN badges progressively since 1987. The branch badge is a small Geneva Cross (RN Medical Assistants have a larger version) worn with a crown above by CPOs and POs and in its basic form by leading rates and below.

16. QARNNS and QARNNS(R) warrant officers and ratings are identified by the Queen Alexandra's monogram worn on blue uniform suits, tropical uniforms and working dress.

Review of RN Badges

17. A comprehensive review of all RN badges, aimed at producing a cohesive badge policy, is due to be undertaken by DNSC during 1996

Annexes

18. Contents of the Annexes are as follows:

Annex A - Existing RN Branch Badges

Annex B - Existing RN Rate Badges

Annex C - Existing RN Officers Badges

Annex D - Obsolete Badges and Replacements
