TABLE 10 – WIRE THREADS/METAL EMBROIDERY

10.1 Textile Yarn	<ul style="list-style-type: none"> <li>Textile yarns shall be dyed with sulphur-free fast dyes, to match the colour of the metal wire components; they shall meet the colour fastness requirements stated in Table 9.2, and shall be of adequate strength and durability</li> </ul>
10.2 Metal Wires	<ul style="list-style-type: none"> <li>Metal yarns used shall be electroplated gold and silver as appropriate.</li> <li>Compositions are made up as follows with minimum proportions stated for gold and silver metal elements. <ul style="list-style-type: none"> <li>a. Gold – 2% gold, 1% silver, 97% white metal *</li> <li>b. Silver – 50% silver, 50% white metal</li> </ul> </li> </ul> <p>* The white metal to be 95% copper, 5% nickel</p>
10.3 Composite Yarns	<ul style="list-style-type: none"> <li>Where combination metal and textile yarns are required e.g. as in Orris laces, the metal is to be twisted uniformly over the textile core, the number of turns used in covering the latter being such that complete coverage of the core is obtained, without “grinning” through of the textile base. The composite “metal” yarns used in all cases shall be uniform in diameter, and present a uniform and continuous gold or silver appearance</li> </ul>
10.4 Metal Embroidery Threads	<ul style="list-style-type: none"> <li>All elements of metal, gold or silver embroidery must meet the minimum requirements in composition of gold and silver as stated in section 10.2.</li> <li>Metal Embroidery threads must be tarnish protected to ensure that subsequent handling during the hand embroidery process does not advance tarnishing of the end product. Acceptable protection can be either a light varnish finish or other approved chemical oxidation – prevention treatment, sufficient that it provides adequate protection without adversely affecting the finished appearance of the embroidery</li> </ul>
10.5 Embroidery	<ul style="list-style-type: none"> <li>Embroidery shall be carried out with approved textile yarns and all sewing shall be securely finished off to match those properties of the related standard Pattern</li> </ul>

<b>HANDLING INSTRUCTIONS FOR COLOURS, STANDARDS AND GUIDONS</b>
Colours, Standards and Guidons are vulnerable items and require careful handling at all times. On no account are these items to be laundered or dry cleaned.
If an item becomes excessively soiled or marked consult with Defence Clothing Technical Team before attempting to clean.
Under no conditions are Colours, Standards, or Guidons to be packed away or rolled when wet. Should any of these items become wet they are to be dried carefully and thoroughly by being hung in a warm area and left to dry naturally. Never apply direct heat in an attempt to force dry. In hot and humid climates these items should be frequently aired and stored in a cool place. Ideally, when not in use on parade, they should be wrapped in sulphur-free paper and stored in the container in which they are issued. The continued display of these items involving exposure to bright sunlight and/or humidity causes rapid deterioration and should be limited to special occasions
