You should continuously **save** *your work.*

You **must** *produce a* **hard copy** *for each of the items to accompany a soft copy on the Compact Disc (CD)/ Digital Versatile Disc (DVD).*

Turn Over

Item 1

Eve started a children's home in Uganda where she helps disadvantaged children. She operated for some time but due to increasing expenditures which she could no longer meet, she applied to a charity organization for help. Fortunately, her request was granted and she was asked to make a budget following the guidelines given by the charity organization as shown below;

- Medical fund for each child per term according to age:
  4-8 years is 200,000/=, 9-13 years is 100,000/= and above 13 years is 75,000/=.
- School fees for each child per term is 500,000/= and 750,000/= for primary and secondary school children respectively.
- The budget should clearly indicate the total amount spent on each child per term and the overall amount Eve expects per year.

The organization has scheduled a meeting for all the institutions it helps and Eve is expected to make a presentation of the activities done by the children at the home, available facilities, future plans and the budget.
Eve has details of the children's home and the data to be included in the budget in the **children's file folder**, however, she lacks the ICT skills.

Task:

Help Eve to prepare all that she needs to present in the meeting.
Provide a **soft copy** on a **CD/DVD** and **sample hard copies** of what you have done to help Eve, clearly indicating your **name** and **personal number** as the developer on each of those copies.

Item 2

Summit Forge Secondary School has been facing several challenges in recent years. The school's publicity in the community is poor, students' enrolment has been declining and the school struggles to attract new students.
The head teacher and the school Board of Governors think that by designing a website as a way of marketing the school, the surrounding community and the world at large will get to know more about the school's history, academic programmes, co-curricular activities and contact information.
The head teacher has contracted your ICT teacher to do the work. Fortunately, your teacher has in turn assigned the work to you and provided you with some data you may need in the support folder **my school**.

Task:

Do the assignment.
Provide a **soft copy** on a **CD/DVD** and **sample hard copies** of the assignment, clearly indicating your **name** and **personal number** as the developer on each of those copies.
