

WEBDESIGN THEORY (NLSC)

Item I

Scenario: You have been hired by a local publishing company to create a new website that will serve as an online publication platform. This platform will host articles, e-books, and multimedia content for their audience.

Question: Explain what a website is and outline the key requirements needed to design a functional and user-friendly website for this publishing company. Consider aspects such as content management, user interface, and technical requirements.

Item II

As a web developer, you are tasked with creating a new website for a digital magazine. You need to explain to the editorial team the difference between developing the site on a localhost environment versus a live server.

Question: Compare and contrast developing a website on a localhost environment versus a live server. Discuss the advantages and disadvantages of each approach in the context of the digital magazine project.
