

# EXCEL IN ENTREPRENEURSHIP

---

## O-LEVEL SCENARIO BANK

---

*Empowering Young Entrepreneurs with Knowledge, Skills, and Innovation*

*Written by Mugalu Edrine*

## About this book

This book is a carefully developed **Entrepreneurship Scenario Bank** designed to support learners and teachers under the **New Lower Secondary Competence-Based Curriculum (CBC)**. It aims to equip students with practical **knowledge, skills, values, and innovative thinking** required for real-life entrepreneurship and national development.

The content is structured in line with the **UNEB Entrepreneurship assessment framework**, covering all **Elements of the Construct** across Sections A and B. The book provides well-designed scenarios, guided tasks, sample responses, and UNEB past paper questions to help learners understand how to analyse situations, make informed decisions, and justify their answers logically.

This book goes beyond theory by emphasizing **application of skills, problem-solving, creativity, and critical thinking**. It prepares learners to confidently handle competence-based examination items while nurturing an entrepreneurial mindset for self-employment and responsible citizenship.

It is an essential resource for **students, teachers, and schools** aiming at excellence in Entrepreneurship education and assessment.
